

Maintenance, Improvement and Communal Repair Programmes

We are now preparing with our Contractors to re-start our maintenance, improvement and communal repair programmes.

Due to the pandemic we will be reviewing the rest of the year's contract programme ie kitchens and painting. We will commence with gas central heating installations and external painterwork and then arrange smoke detection installations and electric checks, window and door replacements and kitchen installations.

We will be writing out to you in the next month if you are on one of these first phase of work. This letter will highlight how Contractor proposes to keep you safe through the period of the works. There will continue to be disruption and delays, while we are starting back up our programme, if you have a question about your property we will keep a note and get back to you when our plans are finalised.

All communal repairs notified to either us or our Contractors during the lockdown period will now be programmed to be undertaken in August and September.
